

Full stack developer and computer engineer with 5 years of experience across fintech, consulting, and industry 4.0 environments.

Proficient in React/Next.js and TypeScript on the frontend, and C#/.NET, Java/Spring Boot, and NestJS on the backend. Experienced with microservices, hexagonal architecture, GraphQL, and CI/CD pipelines.

Currently building an Industry 4.0 MES platform in C#/.NET at SKA. Previously contributed to backend microservices for a major Brazilian bank at CWI and delivered full stack freelance projects using Next.js, NestJS, and MongoDB.

Interested in systems programming and exploring Rust for Bitcoin development.
